

AI Workflow Audit and Tool Setup (FL-01)

Name: Ghanna Zubair

Track: General AI Fluency

Assignment: FL-01

Date: July 2026

1. Workflow Audit

Task	Classification	Rationale
Completing FlyRank Assignments	Collaborate with AI	AI explains concepts and reviews work, while I complete and verify assignments.
Learning Machine Learning	Collaborate with AI	AI simplifies difficult topics, but I build understanding through practice.
Python Coding	Collaborate with AI	AI suggests code and explanations; I implement and test it.
Debugging Code	Delegate to AI with Review	AI helps locate errors quickly, but I validate every fix.
Writing LinkedIn Posts	Delegate to AI with Review	AI drafts content that I personalize before publishing.
Building GitHub Portfolio	Collaborate with AI	AI improves documentation while I maintain repository quality.
Researching Datasets	Collaborate with AI	AI helps summarize information; I verify sources.
Reading Documentation	Just Me	Official documentation must be read directly for complete understanding.
Taking Study Notes	Delegate to AI with Review	AI creates summaries which I refine.
University Exams	Just Me	Assessment must reflect my own knowledge.

2. Three Target Tasks

Completing FlyRank Assignments

Success means every assignment is completed, committed to GitHub, and submitted successfully.

Learning Machine Learning & Data Science

Success means I understand concepts, implement them in Python, and can explain them without relying on AI.

Building a Professional GitHub & LinkedIn Portfolio

Success means every project has clear documentation, organized repositories, and professional LinkedIn updates.

3. Tool Setup Checklist

- ChatGPT account created
- Claude account created
- Anthropic Academy account created
- Enrolled in 'AI Fluency: Framework & Foundations'
- Claude Project created (attach screenshot in submission)

Conclusion

This workflow audit identifies where AI provides the greatest value while preserving tasks that require personal judgment and learning. The selected target tasks will be reused throughout the internship to measure productivity, quality, and learning progress.
